

## MARINE PRODUCTS

Kraft Power offers products and services for diesel and hybrid marine propulsion, marine generators, jet drives, and controls. Whether you are on the water for work or play, we have what you need to keep your marine vessels moving and operating smoothly.

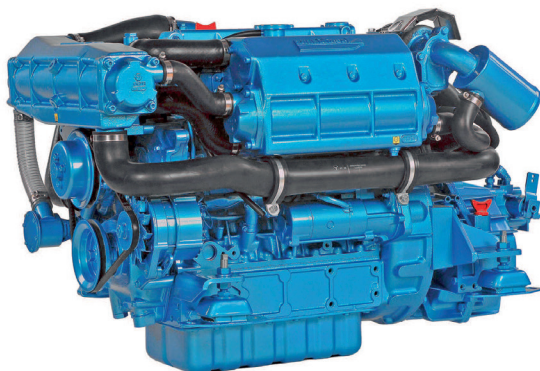

### Kohler Marine Generators

Kohler Marine generators bring industry-leading technology and unparalleled reliability to marine gensets. From 5kw to 500kw, radiator and keel cooling, sound attenuating enclosures and compact frames these generators are built to keep you powered. Kohler Marine Generators are the only generators on the market with built in paralleling capabilities and load management automation. All major class certifications are available (DNV, Lloyds, ABS, BV).

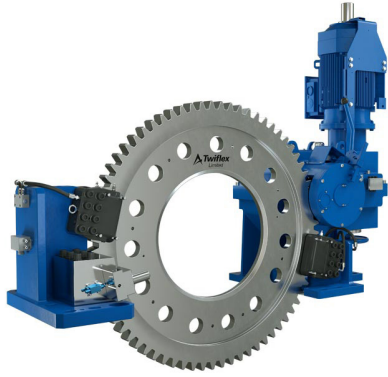

### HamiltonJet

HamiltonJet is the world leader in waterjet propulsion and integrated vessel control. Kraft Power carries an extensive inventory of waterjets and spares as well as technical resources to support your marine operation. If hybridization is of interest, Kraft Power can provide you with the ideal HamiltonJet electric and hybrid drive system.

### Nanni Energy

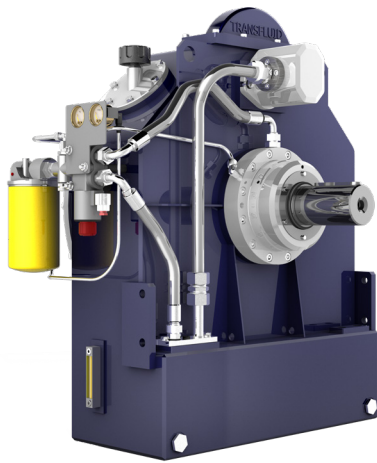

Nanni Energy, a leading specialist in diesel engine marinization, manufactures diesel engine systems for marine propulsion. As experts in marine cooling circuits, their engines are more reliable and more powerful than competing brands on similar engine platforms. Kraft Power carries Nanni Energy diesel engines from 10HP to 1150HP and can supply all Nanni engines with marine gears and controls.

## Altra Industrial Motion

Altra Industrial Motion utilizes advanced technologies and materials together with extensive application expertise and engineering capability to provide reliable clutches and brakes, couplings, pump mounts, gear drives, belted drives and more. Altra products provide dependable performance in challenging marine environments.

Altra products are installed in a variety of marine applications including main propulsion and thruster drives, anchor handling & mooring winches, cranes, and compressors.

## Transfluid

Transfluid is internationally known for the quality of its transmissions, hybrid modules, and Bellmarine electric propulsion systems, couplings for the marine and shipbuilding industry. The range of products designed for this sector includes a wide variety of solutions for high-level marine activities: dredges, internal combustion engines, marine propulsion, pumps and winches. Our Transfluid experts are well-equipped to advise you and to recommend the most appropriate products for whatever your specific application may require.

## Services and Spare Parts

Kraft Power service and support are available for routine and scheduled maintenance and are on call 24/7 for power emergencies. Our experienced technicians are factory-trained and certified to service and maintain peak performance for marine equipment of nearly all makes and models. Our commitment to your satisfaction is supported by an extensive inventory of manufacturers' genuine parts to ensure maximum uptime for your equipment.
