

## POWER GENERATION

Kraft Power designs specific solutions to match any application's needs. With over 50 years of experience in the generator business, we provide expert advice and planning, cutting-edge products, and industry-leading service.

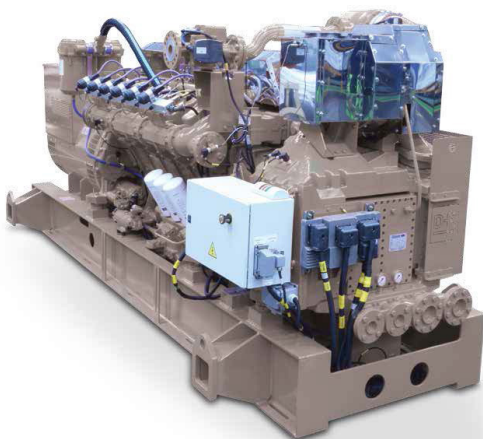

### Kohler Power

- Diesel generators from 10kW to 4000kW
- Gas generators from 8kw to 400kw
- Electronic controls
- Automatic transfer switches
- Paralleling switchgear
- Configurable systems

### Kraft Energy Systems

- Combined Heat and Power (CHP) cogeneration systems from 55kW to 550kW
- Rich burn, lean burn, and biogas
- Containerized or open skid mounted
- Pre-engineered to reduce installation time and costs
- Fully automated and user friendly control system with remote access and monitoring

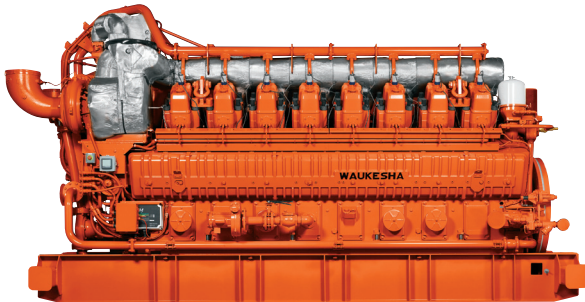

### Siemens Energy

- Power generation systems and engines from 400kw to 2,000kW
- Natural gas and biogas
- Dynamic fuel blending
- Complete containerized energy solution

## AIREM Gas Turbines

- Packaged 1.8mW gas turbine power generation system
- Liquid or gaseous fuels
- Extreme fuel tolerance for environmental utilization of low-quality gases

## Waukesha Gas Engines

- Engines and power systems from 230kW to 2300kW
- High fuel tolerance
- Simple emissions compliance solutions
- Extreme durability in challenging environments

## Controls Upgrades & Revisions

- Services range from revision of existing systems to complete control system replacement
- Extend equipment life while improving its capabilities
- Control systems available for virtually every generator brand
- Technical teams with decades of experience resolving customers' operational, compliance, and performance challenges

## Services and Spare Parts

- Planned service programs
- 24/7/365 emergency services
- Load bank testing
- Emissions control solutions
- Engine/generator control upgrades
- Around-the-clock remote monitoring
- Rental generators and load banks
- Extensive inventory of OEM parts
